

MY ALLERGY TEST

Hello, my name is Rosie and this is my little brother Jimmy and his cuddly friend, Little Chimpy. Today we are going to the allergy clinic to have Skin Prick Tests. This is because the doctor thinks that we may have allergies.

Did you know people can have allergies to lots of things? Such as cats and dogs or trees and grass or even chocolate!

When the nurse does the test she will put small drops of special water on to our arms.

After she has put the drops on, she will use a small pin to prick our arms through the special water to see if we have any allergies. It doesn't hurt us and the nurse tells me I am brave.

When the nurse has finished, our arms where we had the Skin Prick Test starts itching, but the nurse said that it was OK.

A little later the nurse says that she needs to look at my arm. She tells me that I have an allergy to grass and gives me some medicine.

We are going home now to play with our friends. I hope that your Skin Prick Test goes well!

From

Rosie, Jimmy
& Little Chimpy

P.S. We hope you enjoyed colouring in the pictures!
